

Web & Graphic Design

We have a group of talented web/graphic designers to help you create marketing artwork. We can help you design and create your website in either English or Chinese versions. We are familiar with Adobe Master Collection and use it to create the artwork needed by your websites. A professionally designed website will:

- Provide detailed information about your business to potential customers online
- Display your products and services on a global scale 24/7
- Notify present and potential customers about promotions you are running
- Give customers the ability to easily contact you
- Allow you to sell your products and services to anyone around the world at any time

Other than websites, we also do a variety of graphic designs for business, for example: banner ads, ad games, 3D animation, video ad editing for YouTube ..., etc. Please click this [link](#) to see our sample website designs.

If you have further questions, please do not hesitate to contact us at LTC@LogicTreeConsulting.com or TEL: (973) 960-9093.

Sincerely,
